

Doom girl is fighting bad guys

(zooms out to girl playing, just for this scene)
girl is playing it on computer, enters in cheat code

A cheat code is entered, "reverse damage" is on

She takes a hit, and health goes from 56% to 65%, her scratch heals up (surprisingly)

She does some more blasting

Gets hit with a fireball, goes to 110% health, breasts a little perky and abs appearing
The shotgun seems to be bigger than before too :)

She takes a few more hits, but only goes up a small %
Takes out the monsters

Finds a bigger bad guy, gets hit, grows more, attacks back
Continues for a while with bigger bad guys

Finds the last boss, who is smart, doesnt want to attack her

She takes the BFG, puts it to full power and blasts herself, gets huge
Boss gets scared, in defense hits her with the biggest blast

She transcends and becomes as big as the super boss
She than goes outside the game world and "rewards" the player of the game
