

Model Name						
Gyro Fidgets						
Model Description:						
<p>Another fidget to add to the collection, the gyro fidgets. I wanted to start exploring different ways to fidget with the simple gyro concept, which resulted in a few different simple variations. The plan is for these base models to turn into something more "complex" in the future.</p>						
Printing Info:						
<p>**These are just the settings I used to test the model, feel free to use whatever settings work best for you.</p>						
FDM or Resin:	FDM					
Scaling:	Can be scaled up, may have clearance issues if you scale down too much.					
Supports:	None					
Infill/Perimeters:	10% infill + 2 perimeters					
Nozzle Size:		0.4				
Layer Height:		0.2				
Printing & Assembly						
<p>No supports are needed for this model, slice and print. If you want a simple way to make them multicolor without having a multicolor printer, you can just do a color swap halfway through the print like I did with the models in the gallery.</p>						
Assembly:	<ul style="list-style-type: none"> - No assembly required 					
File List (7):	<ul style="list-style-type: none"> - gyro_spinner_v1 (STL) - gyro_round_v1 (STL) - gyro_round_keychain_v1 (STL) - gyro_hexa_v1 (STL) - gyro_hexa_keychain_v1 (STL) - gyro_star_v1 (STL) - gyro_star_keychain_v1 (STL) 					
Changelog/Additional Notes						

3/7/2024: (Initial Upload to Patreon)

- Uploaded spinner, round, hexa, and star shaped fidgets and respective keychains to Patreon :& Thangs.
