

## EXCLUSIVE ADVENTURE SITE PREVIEW

# FORT DUSKMARK: UPPER AND UNDERGROUND LEVELS FROM "KNIGHTS OF THE CRYSTAL BLADE"

ORT DUSKMARK contains, in addition to its ground floor, an upper level for its soldiers, and a secret underground level.

Full area descriptions are found in the adventure.

## UPPER FLOOR

### D16. BALCONY

### D17. BARRACKS

These sparse sleeping quarters are filled with beds and bunkbeds for soldiers.

### D18. MEETING ROOM

Around the table of black wood, military campaigns were once discussed until the early hours. A locked chest contains a cache of secret documents about the fort.

## UNDERGROUND LEVEL

### D19. HALL OF MURALS

This vast hall displays mysterious wall murals. In its alcoves stand full suits of plate armour, in reality a new type of constructs: **clock-work blade-wielders** (new monster). On a dais thrones a huge statue with six arms wielding scimitar blades. Also this turns out to be an animated construct (new monster: **blade-dancer construct**) and the party must find a way to pass this deadly guardian.

### D20. CENTRAL HALLWAY

White crystals on plinths silently light up. Strewn over the hallway's floor are heaps of skeletons and broken bones - earlier victims of the construct guardians.

### D21. CRYSTAL CAVERNS

These natural caverns are connected by winding tunnels. Each cavern is filled with stones protruding like fangs from the ground and the ceiling. Among these stones, large black crystals stick out.

These exceedingly rare black crystals can be mined and used to create *black crystal blades* with special powers.

### D22. CRYSTAL CHARGING APPARATUS

This hall is dominated by a remarkable apparatus with mechanical arms, alembics, knobs and levers, and at its centre: two copper pincers.

If turned on, this mechanical marvel, constructed by a famous gnome inventor, can be used to charge crystals with magic force, allowing the characters to create powerful *magic crystal blades*.
