Chapter 22 - Legendary.

But now, the most crucial moment, the legendary card. Lukas had high expectations. He wanted it to be a character because he was sure it would help him.

"But if it's a weapon I can use, that will be good too." Lukas put his hands together and hoped for an excellent item to appear. The card slowly turned over, and his prize appeared with a powerful glow that blinded Lukas.

It was not a character but an item.

"But this is absurd. Am I supposed to get something like that?" It was not a weapon but a necklace. A necklace with a bright yellow gemstone on it. Despite the gemstone, it was a discreet necklace, and Lukas could wear it without problems.

[Legendary Necklace]

Effect - Increases all users' status by 40%.

Rank - S

Lukas held the necklace in his hand and stared at it for a while, still not believing that such a good item could exist. He could sell for a price that would be enough to live well for the rest of his life.

That was the level of this necklace.

"Is there any item as good as that out there? I don't think I've heard of it before. Should I put it on?" Lukas put it around his neck. In the same instant, he already began to feel the difference in his body.

[Name] Lukas

[Class] Media Player SSS (Single Class)

[Level] 6 (50/600)

[Strength] - E (60%)

[Stamina] C (20%)

[Agility] D

[Magic] E (40%)

He had moved up five more levels because of the massacre he caused. But since the '%' was random, not one Rank had increased because of his level gain. What had increased the rank of his magic and resistance was the necklace he was wearing.

But even though it had a 40% increase, his strength and agility had not yet increased another Rank. But he felt that he was close. His body was lighter, and his senses had improved.

It was a legendary item.

"Now that my magic has increased one Rank, I can buy a magic skill. Let's do that."

But before he did that, Lukas cleared out all the notifications he had received. Notifications of the goblin deaths and also the likes he was getting. By the way, his number of Likes kept increasing.

It had already reached 5,000 again. The number of Likes that had been decreasing was going up again, probably because his video had received a new promotion or something.

"Okay, I'll buy a magic skill and use the rest of the likes on the gacha." He opened the store and looked for magic skills with an average price of 2.500 likes. Attack magic, as Lukas didn't need any support magic.

Like healing magic or magic to increase the statuses of his companions. People with the [Saint] or [Priest] class could do that.

"Which magic has the most destructive power? Probably fire magic. There are a lot of different skills."

[Explosion] [Fireball] [Lava Barrier] [Flame Creation] [Hellish Heat] [Torturous Burning] [Melting] [Fire Storm] and many other similar skills.

All were attack skills. Explosion, Flame Creation, Hellish Heat, and Fire Storm were area attacks, perfect for the situation. Fireball, Torture Burning, and Melting were single-target attacks.

And the only defensive magic was Lava Barrier.

"An area attack is good. Fire Storm seems the best of the four, and it's also the most expensive." Lukas had to do it fast, so he didn't think much about it and bought the skill.

[Fire Storm]

Effect - Create a firestorm with 600C° and turn all targets within 20 meters into ashes.

Rank - B

Rank - 3.300

"3,300 likes was not a bad value for such a powerful Rank B skill. And a 600C° heat... I should be careful when using that." And now, with that skill acquired, Lukas wanted to look at the passive skills.

All the skills he had bought so far were active skills. The only passive effects he was getting were the effect of the rings and also the necklace he had just received.

"But I said I would use the gacha again, didn't I? I will try to summon a character; if that doesn't work, I will go over there anyway to deal with those goblins. How long has it been?" Lukas had lost more than 10 minutes.

Those guys wouldn't last long, and Lukas knew it.

So he opened the gacha, and without thinking, he used it.

-1,000 = Nothing

-1.000 = Nothing

And then, finally, a golden card appeared. Lukas put his hands together again, hoping that it was a character, and fortunately for him, it was a character.

Lukas celebrated internally. His smile could be seen even on his mask.

But the character... he didn't know either.

"I already said I'm not an Otaku, although I know some anime. But if it's a golden card, he must be good, right?" Lukas was confident. He must be good if the system puts him as a gold card.

The character's name was [Abarai Renji]

Lukas looked at his Status and saw the name of the anime the character was a part of.

"Bleach... I've heard of it before. I know Ichigo and that girl with orange hair. Or is she a redhead? But this is the first I've heard of this guy. He's probably not a very relevant character to the story."

[Abarai Renji]

Speed - Rank C

Strength - Rank C

Magic - Rank C

Quality - Rank B

Popularity - Rank D

"Is he really a gold card? I thought it would be better."
