## EVOLVING ITEMS

Several items in this collection can evolve into stronger items through unique means, which is a permanent change. The options presented here are not meant to be the only way for that item to evolve, and are merely meant to provide an example of a suitable situation that would cause evolution.

Most items are listed as evolving by spending time on or being exposed to the energies of other planes, but there are numerous ways that DMs can make items evolve, as detailed in the Pokémon Inspired Weapons & Items - Evolution Guide and Index book, such as using major events or exposure to certain items, like the Elemental Stones detailed in the Guide. See the [Pokémon Inspired Weapons & Items - Evolution Guide and Index](#) for more information.

Anytime you take damage, or are otherwise dirtied or disheveled, you must make a DC 13 Wisdom save or start trying to clean yourself up, even in the middle of battle. These efforts occupy your actions, making you do things like move to a source of water to wash off dirt, even if that water contains a dangerous creature. You can make the save again at the end of your turn, and this effect lasts until you either make the save or have cleaned yourself up.

**Evolving:** If this bow remains in Shadowfell for a decade, it will become a 724 - Silvarbow.

The bubble contains 60 gallons of clean water (provided it hasn't come in contact with something like poison or acid), which can be collected with the proper equipment, but when the bubble is popped the water will thoroughly splash creatures within 5 feet of it, giving them resistance to fire damage but vulnerability to lightning and cold damage, lasting until they are either hit by one of those damage types, they dry off, or for 1 minute.

While attuned to this cloak: you are immune to poison damage and the poisoned condition; you can eat putrid trash for sustenance without any negative effects; whenever another creature touches you or hits you with a melee attack while within 5 feet of you, they must make a DC 14 Constitution save per attack, taking 1d6 poison damage per fail; and each day 1d2 pieces of crystallized poison, to a maximum of 6, grow large enough that you can easily pull them off the cloak as a bonus action, and can be used as sling ammunition, doing 1d4 poison damage on contact, including handling them, and will shatter on impact. The crystals will slowly eat through ordinary organic material like wood, linens, and leather, and burn a hole in any non-corrosion proof container over 1d4 hours.

**Cursed.** This cloak is cursed. While cursed, you always feel hungry and have a voracious appetite. Whenever you come across any trash, you must make a DC 14 Wisdom or go into an eating frenzy until you can no longer find anything to eat, at which point you pass out for 1d4 hours and gain a level of exhaustion. You can attempt the save again after 1 minute, and a success ends the frenzy without any passing out or exhaustion.

**Evolving:** If this cloak is submerged in at least a gallon of 10 or more liquid poisons for an hour, it will absorb them and become a **089B - Muktle**.

Any items in the shield can be clearly seen staying where it was placed, albeit appearing slightly distorted by the water, and placing or retrieving an item from the shield requires an action as you reach into the water. Creatures that can breathe water inside the shield can survive up to a number of minutes equal to 4 divided by the number of creatures (to a minimum of 30 seconds) after which time they begin to suffocate. This shield can be placed in an extradimensional space without issue. If you lose your attunement to this shield, the items within will remain within the shield.

The Solar Blade attack is a ranged attack of 20/60, uses your attack bonus for this scythe, and does 2d10+1 radiant damage.

While cursed, your hair, skin, scales, feathers, fins, and other features become various shades of brilliant pink with occasional green highlights, and you become very concerned about grooming and maintaining your appearance. Anytime you take damage, or are otherwise dirtied or disheveled, you must make a DC 13 Wisdom save or start trying to clean yourself up, even in the middle of battle. These efforts occupy your actions, making you do things like move to a source of water to wash off dirt, even if that water contains a dangerous creature. ### 757 - STILANDITOX

**Weapon (Dagger, Cursed) – Uncommon (275 gp, requires attunement)**

This gray dagger has a fiery red groove down the blade, as well as a red line across the crossguard, ending in flat circle tips. The pommel is also a flat circle with a red spot on it and a line leading up to the blade groove. The handle is wrapped in black cloth.

The blade secretes a poisonous gas with a sweet sulfur scent. The gas dissipates rapidly, requiring the blade be very close to the mouth for a creature to inhale a significant amount of gas, but anyone who does closely inhales the gas for a minute becomes dizzy and disoriented. This gives them the Poisoned condition for as long as they continue to inhale the gas, and for a minute after they stop inhaling the gas. The gas does not last long after being secreted, and any attempts to collect it will be unsuccessful, with only a faint sweet sulfur scent left behind.

Attacks with this dagger do an additional 1d4 poison damage from the gas it secretes, which ignores any resistance to poison damage the target has (but not immunity). The gas is flammable and easily lit by flame, which changes the poison damage to fire damage and emits normal light for 5 feet and dim light for an additional 5 feet. Extinguishing the fire requires an action.

While attuned to this dagger: you are immune to the Poisoned condition.

**Cursed.** This dagger is cursed. While cursed, you have disadvantage on rolls to prevent being Charmed, and if you are immune to being Charmed, you are no longer immune.

### 758 - SABRAZZLE

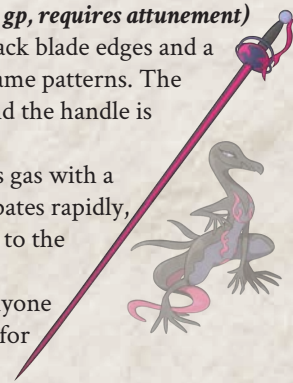

**Weapon (Rapier) – Rare (7580 gp, requires attunement)**

This hot pink +1 rapier has black blade edges and a gray cage guard with hot pink flame patterns. The pommel is a round lilac jewel, and the handle is wrapped with black cloth.

The blade secretes a poisonous gas with a sweet sulfur scent. The gas dissipates rapidly, requiring the blade be very close to the mouth for a creature to inhale a significant amount of gas, but anyone who does closely inhales the gas for a minute becomes dizzy and disoriented. This gives them the Poisoned condition for as long as they continue to inhale the gas, and for a minute after they stop inhaling the gas. The gas does not last long after being secreted, and any attempts to collect it will be unsuccessful, with only a faint sweet sulfur scent left behind.

Attacks with this rapier do an additional 1d4 poison damage from the gas it secretes, which ignores any resistance to poison damage the target has (but not immunity), and if the target isn't immune to the Poisoned condition, they must make a DC 13 Constitution save or be Charmed by you until the end of their next turn or they take damage. The gas is flammable and easily lit by flame, which changes the poison damage to fire damage, nullifies the Charm effect, and emits normal light for 10 feet and dim light for an additional 10 feet. Extinguishing the fire requires an action.

While attuned to this rapier: you are immune to the Poisoned and Charmed conditions; and you have advantage on rolls to prevent being intimidated.

### 105B - OSSTAFFEUR

**Weapon (Quarterstaff) – Rare (5100 gp, requires attunement)**

This white +1 quarterstaff is made of bone, with a large square heart-shaped epiphysis at each end. The middle section is wrapped in burnt cloth with a bone-covered handle in the center, which has the skull top from a horned creature attached to the top.

While attuned to this staff: you gain the *Toll the Dead* cantrip (DC 16); the staff has 2 charges, refreshing at midnight, and you can expend 1 charge to cast *Spirit Guardians* (DC 16); and you can also speak a command word as an action, and the ends of the staff will alight with ghostly green flames, emitting light for 10 feet and dim light for an additional 10 feet. Repeating the command word as an action extinguishes the flames. While the staff is aflame, attacks with this staff do an additional 1d6 fire or necrotic damage (your choice), and when hit the target must make a DC 16 Constitution save, with a fail resulting in the next attack on them having advantage.

### 759 - KEULURSI

**Weapon (Club, Cursed) – Uncommon (95 gp, requires attunement)**

This pink cylindrical club has a white top and white band around near the top with two white-tipped nubs on either side. The brown handle has a pink sphere pommel with a red band around it. The whole club is covered with soft and fluffy fur.

While attuned to this club: you have resistance to non-magical slashing, piercing, and bludgeoning damage, but are also vulnerable to fire damage.

**Cursed.** This club is cursed. While cursed, you are a bit of a klutz and people who aren't immune to being magically Charmed consider you incredibly cute, giving you advantage on rolls to Charm or Persuade them.

Being a klutz makes it difficult for you to hold on to and use handheld tools and objects, and you automatically fail Sleight of Hand rolls.

People who consider you cute will have a hard time trying to not pet and hold you, and when they see you must succeed a DC 14 Wisdom or immediately rush over to pet and hold you, which puts you in a Grapple. On a critical fail they also become Charmed by you for 1 minute. They are then immune to this effect for 24 hours, unless you attempt to Charm or Persuade them, which causes them to make this save again after your attempt, regardless of your success.

**Evolving:** If this club remains attuned to someone with a Strength of 19 or higher for a month, it will become a 760 - Keulurso.

### 760 - KEULURSO

**Weapon (Greatclub) – Rare (2650 gp, requires attunement)**

This black cylindrical +1 greatclub has pink on the top half of the head with a thick white band near the top, with two large nubs on either side. The long black handle has a pink oval sphere pommel with a red band around it. The whole club is covered with soft and fluffy fur.

While attuned to this greatclub: you have resistance to slashing, piercing and bludgeoning damage, but are also vulnerable to fire damage; you have advantage on rolls to Grapple and Restrain targets; and you have advantage on Intimidation rolls and Strength saving rolls.

### 761 - CLOQUINE

**Wondrous (Cloak, Cursed) – Uncommon (176 gp, requires attunement)**

This maroon poncho cloak has frilly white trim along its bottom of the front and back, and a green hood with shoulder pads, as well as a pad on the front over two gold buttons. The inside is lined with white fabric.

While attuned to this cloak: you cannot be magically put to sleep; and if you are in sunlight, you have advantage on saves to prevent any status conditions caused by enemy attacks.

**Cursed.** This cloak is cursed. While cursed, you will give off a sweet and delicious fruity scent that attracts hungry creatures, and creatures with a keen sense of smell can easily track and find you regardless of any attempts to hide yourself.

**Evolving:** If this cloak remains attuned to someone with a Charisma of 15 or higher for a month, it will become a 762 - Steentle.

### 762 - STEENTLE

**Wondrous (Cloak, Cursed) – Rare (1275 gp, requires attunement)**

This maroon cloak has a white hoop skirt section at the bottom, with a green hood and green leaf-like sections down the sides. A large pink bow is tied at the neck, and the inside is lined with white fabric.

While attuned to this cloak: you and any of your allies within 5 feet of you cannot be magically put to sleep; you are immune to the Charmed condition; and if you are in sunlight, you have advantage on saves to prevent any status conditions caused by enemy attacks.

**Cursed.** This cloak is cursed. While cursed, your personality becomes callous and uncaring, and you no longer care if others get hurt or objects get damaged because of your actions. If you are a Good aligned character, you become Neutral aligned while cursed.

**Evolving:** If this cloak remains attuned to someone with proficiency in Intimidation for a year, it will become a 763 - Tsarobena.

### 763 - TSAROBENA

*Wondrous (Cloak, Cursed) - Very Rare*  
(13,750 gp, requires attunement)

This long cloak has two pink frilly collars around the front that resemble large flowers, as well as a stiff upright pink ruff collar on top. The green hood has a maroon orb on top with four thin gold stripes around it that resembles a crown, with long green tails down the back that have yellow spots along the top and bottom. The front of the cloak is the white on top half and maroon on the bottom half, with maroon drawstrings hanging under the hood and collars.

While attuned to this cloak: you and any of your allies within 10 feet of you cannot be magically put to sleep; you are immune to the Charmed condition; if you are in sunlight, you have advantage on saves to prevent any status conditions caused by enemy attacks; if you do not have any other magic items that enhance your unarmed strikes, you gain +1 to your unarmed strike attack and damage rolls; and once per turn, if an enemy attempt to attack you with a single target attack (regardless if melee or ranged, magical or mundane) they must succeed an Intelligence check against your Passive Intimidation (10 + your Intimidation), a fail resulting in them becoming incapacitated until the end of their turn as they freeze up at your regal majesty.

**Cursed.** This cloak is cursed. While cursed, you believe you are of royal heritage, regardless of the truth and any contradictory evidence presented to you. You will act however you think a strong and protective royal should act, and you will try to find your kingdom and become a recognized member of it.

### 764 - CURELEIELD

*Armor (Shield, Cursed) - Rare*  
(3770 gp, requires attunement)

This green +1 shield has a blue rim and an orange upper half with two large green domes in the middle, looking like eyes. The top of the shield has a golden wreath across it with a green curled crest in the middle. They are often found with 2d4 flowers attached to the blue rim.

While attuned to this shield: you can attach and remove flowers from the blue rim of this shield as an action, and they will stay fresh as long as they are attached to the shield; you can also remove all the attached flowers at once as an action with a command word, which will turn them into a blue string flower lei necklace that will stay fresh for 4d2 days; you have proficiency in the Medicine skill, or expertise if you are already proficient; status conditions you have end or can be ended with a save at the start of your turn instead of the end of your turn; if you are in plant filled terrain (such as a grassy field or forest) when you preform an action or bonus action that regains hitpoints, you can add your Medicine skill to the hitpoints recovered; and while in combat, if you are going to perform an action or bonus action that would heal someone (such as by regaining hitpoints or removing a status condition), you can add your Initiative bonus to your Initiative for that round, adjusting the turn order accordingly.

**Cursed.** This shield is cursed. While cursed, you feel uneasy when not near flowers. If you take a long rest when not in or near an area with flowers, you must make a DC 13 Constitution save or suffer a level of exhaustion. Levels of exhaustion suffered this way do not disappear unless you take a long rest in or near an area with flowers. You can decrease the DC by 1 for each different living flower type you add to the shield between long rests (for example, two red roses would only count as one flower, but a red and a blue rose would count as two flowers), to a maximum of 10, and a flower type can't be used this way again for one year. However, the DC increases by 1 for every long rest not in or near an area with flowers. If the DC 13 or higher, it will reset to 13 after a long rest in or near an area with flowers. Removing flowers from the shield, either individually or as a lei necklace, does not cause the DC to increase or reset.

### 765 - KOMMANDUCHIWA

*Wondrous (Fan, Cursed) – Very Rare  
(26,550 gp, requires attunement)*

This uchiwa fan is made of six long leaves, with their stems woven together into a handle. The top of the handle is bound by a knot of blue and orange wool, with long strands of purple wool going up the leaves and holding them together. The bottom of the handle is held together by a white pommel of hardened clay with an orange four-pointed star on it.

While attuned to this fan: you are immune to the Stunned condition; as a reaction, you can magically pass an item on your person to an ally within 30 feet of you; you can sense your conscious allies within 60 feet of you and know when they are about to attack, giving you advantage to Dexterity rolls to avoid getting caught in their attacks, taking half damage on a fail and no damage on a save; and once between long rests, as an action you can wave this fan and instruct a creature you can see within 60 feet of you to immediately repeat their last action, provided they have the resources to perform it (ie spell slots, arrows, etc), otherwise you will waste your action. This does not consume the creature's action, and they will aim at the same target/location as before if it is still within range, otherwise they can change the target as they see fit. If the action requires any sort of roll (such as an attack roll), they make a new roll.

**Cursed.** This fan is cursed. While cursed, you have a lofty attitude and will frequently give others orders. If someone doesn't follow one of your orders, you must succeed a DC 15 Wisdom save or try to run as far away from all other creatures as possible in an attempt to seek solitude. You can attempt the save again at the end of your turn, and will continue to run away until you make the save.

### 766 - PASSIMIARMOR

*Armor (Breastplate, Helm, Cursed) – Very Rare  
(26,650 gp, requires attunement)*

This black +2 breastplate has a white furry lining and trim, except for the shoulder pads, which have green trim below a leaf-like marking, with two more leaf markings on a plate on the front of the breastplate. The breastplate has a matching helmet with a light green top that has a small orange blaze on the front, and the bottom is white except for the black muzzle and visor. The back has two leaves sticking up from it.

While attuned to this armor: you have proficiency with all weapons that have the Thrown property; the normal range of Thrown weapons increases by 10 feet for you (so 20/60 becomes 30/60); you have advantage on attack rolls against a creature if at least one of your allies is within 5 feet of the creature and isn't incapacitated; if a hostile creature gives you disadvantage on any rolls, you have advantage on your attacks with this breastplate for the duration of the disadvantage, and if the disadvantage is on attack rolls, then this cancels out the disadvantage; and whenever an ally within 60 ft of you drops to 0 hitpoints, you can use your reaction to copy the magical properties of one Very Rare or lower magic item they are attuned to, replacing all of the magical benefits of this breastplate (but not its curse) until you dismiss the effect, are rendered unconscious, or 1 minute passes.

**Cursed.** This armor is cursed. While cursed, you seek a strong leader to follow, which you determine by who can throw things the farthest. You will ask potential candidates (which can include yourself) to throw the same agreed-upon objects (like darts, javelins, axes, etc) on a range for 3 Strength attack rolls to determine their distance. The highest roll is the farthest and winner, and the 2nd highest roll acts as the tie-breaker if necessary. You now recognize the winner as your leader, and will follow their orders without question. However, if your leader (including you) fails 3 ranged attacks on the same day, you will no longer recognize them as your leader and will seek a new one. You will also encourage your leader to accept any challenges they receive, and will recognize their outcomes.

### 767 - WIMPODOU

This silver +1 scale mail is made up of triangular pieces of insect carapace, with three of the pieces down the front being a dark gray. The top and bottom of the front have purple trim, while the back is a dark gray, and has purple shoulder straps attached to the inside.

While attuned to this scale mail: you can breathe in water; and you can eat things like putrid trash, poisoned items, and rotten food for sustenance without any negative effects.

**Cursed.** This scale mail is cursed. While cursed, you become cowardly by nature and wary of sudden noises and movement. Anytime something suddenly appears in front of you, dashes towards you, or makes a loud sound that you can hear, you must make a DC 16 Wisdom save or become Frightened of that thing for 1 minute.

Additionally, if you are below half of your maximum hitpoints, whenever a creature you can see targets you with an attack, you will automatically use your reaction to magically swap your place with a random ally within 15 feet of you, and your ally becomes the target instead. If you cannot move, such as with the Grappled, Restrained or Paralyzed conditions, you still switch places, and your ally may now be the one affected with that status condition, depending on the situation (such as a snake's constriction).

**Evolving:** If this scale mail remains attuned to someone with proficiency in Wisdom for a year, it will become a 768 - Golisopodou.

### 768 - GOLISOPODOU

**Armor (Scale Mail, Cursed) – Very Rare (12,675 gp, requires attunement)**

This silver +2 scale mail is made up of triangular pieces of insect carapace, with three of the pieces down the front being a dark sea green. **Cursed.** This scale mail is cursed. While cursed, if you are below half of your maximum hitpoints, whenever a creature you can see targets you with an attack, you will automatically use your reaction to magically swap your place with a random ally within 15 feet of you, and your ally becomes the target instead. If you cannot move, such as with the Grappled, Restrained or Paralyzed conditions, you still switch places, and your ally may now be the one affected with that status condition, depending on the situation (such as a snake's constriction).

### 769 - SUNABARMOR

**Armor (Leather, Cursed) – Rare (2695 gp, requires attunement)**

This armor is made of a thin sheet of dull beige sand held together by spiritual forces, acting as +1 leather armor. A red and white trowel-shaped emblem sits over the heart, and a rounded black triangle and arc of black sand over the stomach, with two gray jewels in the arc making them look like a face.

While attuned to this armor: you do not take any damage from sandstorms; once per day, if you are in a sandstorm or sandy terrain you can heal yourself for 1d8+1 hitpoints as an action; and if you are submerged in water or take damage caused by water, like crashing waves, either natural or magical in origins, your AC increase by 1 for 1 minute. This effect does not stack.

**Cursed.** This armor is cursed. While cursed, you are unwilling to part with the armor, keeping it within reach at all times. If you are not wearing the armor, attacks on you have advantage.

**Evolving:** If this armor remains in or near sandy terrain for a year (such as by a beach), it will become a 770 - Palossarmor.

### 770 - PALOSSARMOR

**Armor (Studded Leather) – Very Rare (12,650 gp, requires attunement)**

This armor is made of a thin sheet of orange-brown sand held together by spiritual forces, acting as +2 studded leather armor. A red and gray trowel-shaped stone sits just below the center of the neckline, surrounded by pastel blue and pink triangular stones.

While attuned to this armor: you do not take any damage from sandstorms; three times per day, if you are in a sandstorm or sandy terrain you can heal yourself for 1d8+2 hitpoints as an action; and if you are submerged in water or take damage caused by water, like crashing waves, either natural or magical in origins, your AC increase by 1 for 1 minute. This effect does not stack.

### 771 - PYUKURABIT

**Armor (Shield, Cursed) – Rare**  
(2715 gp, requires attunement)

This black +1 shield has a white five-point asterisk in the center, with a pink dot at the end of each arm. Six pink nubs protrude around the shield, with the two in the middle being longer than the others. The inside of the shield is lined with a fluffy white material.

While attuned to this shield: you can breathe in water; you only require half the amount of water each day than you normally would (per PHB 185); have advantage on rolls to prevent effects that would dehydrate you; if you are afflicted with the Blind, Deafened, Paralyzed, Petrified, Poisoned or Magically Asleep condition, you can use your action (even if you couldn't otherwise use your action) to cure one condition and heal yourself for 1d8+1 hitpoints; and if an enemy attack drops you to 0 hitpoints, you do Force damage to the attacker equal to the number of hitpoints you had before dropping to 0.

**Cursed.** This shield is cursed. While cursed, you will develop a favorite spot that you want to spend all your time in (if you do not already have one). This spot should be one where you feel safe and comfortable, with plenty of good food available, and can be one that travels, such as a room on a ship. Every time you take a long rest away from this spot, you must roll a DC 3 Constitution save, suffering a level of exhaustion on a fail, and increasing the DC by 1 on a pass. Levels of exhaustion suffered this way do not disappear unless you take a long rest in or near your favorite spot, and the DC will reset to 3 as well when you take a long rest there.

(requires attunement)

The helmet has a thick round collar with four vanes protruding in an X pattern, each ending in three spikes around a green hexagon. A mane of long gray fur hangs from the bottom of the collar.

While attuned to this helmet: critical hits on you don't do any damage to you or have any other effect on you.

**Cursed.** This helmet is cursed. While cursed, your power has been limited, giving you a -1 penalty to your AC and Saving Throws. Additionally, whenever a Hostile creature damages you while the helmet is in your possession, you must succeed on a DC 25 Wisdom saving throw or go berserk. While berserk, you must use your action each round to attack the creature nearest to you. If you can make extra attacks as part of the Attack action, you use those extra attacks, moving to Attack the next nearest creature after you fell your current target. If you have multiple possible Targets, you Attack one at random. You are berserk until you start Your Turn with no creatures within 60 feet of you that you can see or hear.

**Evolving:** If you succeed on this helmet's berserk save 10 times in a row, it will become a 773 - Amigentoak.

- Thunder - Dark Gray

771 - PYUKURABIT

### 774A - MINIORSTOP

**Armor (Shield) – Very Rare (17,550 gp, requires attunement)**

This light-brown stone +2 shield has ten white points around its edge, five large and five small, protruding from the shield's rocky exterior with dark brown triangles around them. Five thin cracks spiral inwards from the edge to the center of the shield, with large black spots between them, each with a smaller dark brown spot and three triangles along one side.

While attuned to this shield: you cannot be inflicted with the Blinded, Charmed, Deafened, Frightened, Paralyzed, Petrified, Poisoned, and Stunned conditions. If you had one of these conditions before attuning to this shield or when the shield changes form, you are still afflicted with that status condition.

**Form Change:** At the start of your turn, if you are at or below half of your maximum hitpoints, this shield will magically change into a 774B - **Miniorstar** as the rocky coating breaks apart into dust, which you are attuned to, and holding properly if you were holding the shield properly.

### 774B - MINIORSTAR

**Weapon (Morningstar) – Very Rare (17,550 gp, requires attunement)**

This stone +2 morningstar can be found in a variety of colors, like red, orange, yellow, green, blue, indigo, or violet. While attuned to this morningstar: you gain +3 on your initiative, which is applied immediately if the weapon changes form in combat; you gain a +1 bonus to your AC while you are wielding this morningstar and another melee weapon in each hand; and when you engage in two-weapon fighting with this morningstar, you can add your ability modifier to the damage of this morningstar even if it's the bonus action attack.

**Form Change:** At the start of your turn, if you are above half of your maximum hitpoints, this morningstar will change into a 774A - **Miniorstop** as the shield's rocky coating magically appears around it, which you are attuned to, and holding properly if you were holding the morningstar properly. It will also revert to its shield form if it becomes unattuned.

### 775 - NEKKOMAHAMMER

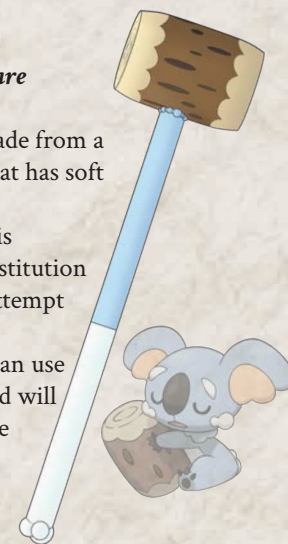

**Weapon (Warhammer, Cursed) – Very Rare (16,750 gp, requires attunement)**

This wood +2 warhammer has a head made from a carved log, with a blue and white handle that has soft fluffy balls at each end.

When a target is hit by an attack with this warhammer, they must make a DC 15 Constitution save or fall asleep for 1 minute. They can attempt the save again at the end of their turn.

While attuned to this warhammer: you can use the head of this warhammer as a pillow, and will be very comfortable; you are immune to the Blinded, Charmed, Deafened, Frightened, Paralyzed, Petrified, Poisoned and Stunned conditions; and once per long rest, you can cast the *Sleep* spell at 4th level from this warhammer.

**Cursed.** This warhammer is cursed. While cursed, you are perpetually asleep, even if you could not be magically put to sleep, but you are immune to any other effects that would put you to sleep. You can still act as if you are sleep walking and talking, but due to your drowsy nature, you have disadvantage on all Intelligence, Wisdom, and Charisma checks. During long rests, you enter a deep sleep, becoming completely unresponsive and cannot be stirred by anything short of taking damage.

### 776 - TORTURABAKU

**Armor (Shield, Cursed) – Very Rare (13,575 gp, requires attunement)**

This yellow +2 shield is a flat eight-point star with red trim and eight dark brown spikes on its face, four large and four small. Three red tassels with pointed sides hang from the bottom of the shield.

While attuned to this shield: you can eat volcanic materials for sustenance; you are immune to fire damage; critical hits on you are treated as normal hits; and twice between long rests, as a bonus action you can prime the shield to set a trap. If you are hit by a melee attack before the start of your next turn, the trap is sprung and the attacker takes 6d6 fire damage as the exterior of the shield violently explodes. Priming the shield can be done stealthily with a Sleight of Hand check against enemies' Perception checks, with advantage on their Perception check if they are within 5 ft of you.

**Cursed.** This shield is cursed. While cursed, you feel weakened by water and rain. You cannot swim, reducing your swim speed to 0 regardless of your abilities, spells cast on you, or the effects of any other magic items. When you are in rain, submerged in water, or for your turn after being hit by a significant amount of water, you have disadvantage on your attack rolls, and the shield's trap ability does no damage, instead fizzling out from the water.

### 777 - TOGEDEMPALE

**Weapon (Morningstar) – Uncommon (975 gp, requires attunement)**

This metal morningstar has yellow and brown triangular spikes on its head, and a white handle.

Attacks with this morningstar do an additional 1 lightning damage, and once per round, the target must make a DC 7 Constitution save or be Stunned until the end of their next turn.

### 075B - GEOROK HAMMER

**Weapon (Single Head Meteor Hammer) – Rare (5,700 gp, requires attunement)**

This +1 gray stone meteor hammer has a round head with black spikes around it, attached to a black cord with an orange-banded stone rod counterweight on the other end. The black spikes and cord are black sand held together by magical electromagnetic powers.

Attacks with this meteor hammer do 1d10+1d4+1 lightning damage instead of 1d10+1 bludgeoning damage.

When an enemy wearing metal armor or made of metal is struck by the meteor hammer, they must make a Strength save, with the DC depending on their armor (see the Maglock table) or be restrained as the metal pieces stiffen and stick together, lasting for 1 minute. They can attempt to break free on their turn as an action with another Strength roll.

While attuned to this meteor hammer: once between long rests, when you are reduced to 0 hit points but not killed outright, you can drop to 1 hit point instead.

### 074B - KOMADOL HAMMER

**Weapon (Single Head Meteor Hammer) – Uncommon (1,640 gp)**

When an enemy wearing metal armor or made of metal is struck by the meteor hammer, they must make a Strength save, with the DC depending on their armor (see the Maglock table) or be restrained as the metal pieces stiffen and stick together, lasting for 1 minute. They can attempt to break free on their turn as an action with another Strength roll.

### 076B - GEOWATTZ CANNON

**Weapon (Handcannon) – Very Rare (37,300 gp, requires attunement)**

This +2 gray stone handcannon has a black, two-prong muzzle lined with orange octagons. A set of black handles come out of the top, with an orange button on the back handle.

This handcannon does not require gunpowder, instead charging and firing the ammo through magnetism as part of the loading action. This does require the ammo to be a magnetic substance, like iron or steel. Attempts to fire anything that isn't magnetic, such as copper, silver, lead, or gold, will fail, wasting the charge.

The cannon has 8 charges that refresh at dawn. 1 charge can be expended to make a handcannon attack, provided the cannon is loaded with suitable ammunition. On a successful hit, the target takes 2d10 bludgeoning and 3d10+2 lightning damage (as opposed to a normal handcannon ball's 4d10 bludgeoning damage), and if they are wearing metal armor or made of metal, they must make a Strength save, with the DC depending on the armor (see the Maglock table) or be restrained as the metal pieces stiffen and stick together, lasting for 1 minute. They can attempt to break free on their turn as an action with another Strength roll.

While attuned to this handcannon: once between long rests, when you are reduced to 0 hit points but not killed outright, you can drop to 1 hit point instead.

Attacks with this handcannon do an additional 1d6 piercing damage.

While attuned to this handcannon: anytime you down a creature, you gain a +1 to this weapon's attack and damage rolls, to a maximum of +5, each instance lasting for 1 minute. Additional instances replace the oldest instance ; and you can stand astride the handcannon and speak a command word causing it to hover beneath you, and can be ridden in the air with a flying speed of 50 feet. It can carry up to 400 pounds, but its flying speed becomes 30 feet while carrying over 200 pounds, and stops hovering when you land. It cannot be used as a handcannon while flying.

**Cursed.** This handcannon is cursed. While cursed, you feel the need to root yourself to one spot, literally. Whenever you take a long or short rest, you must spend the majority of it on natural ground, and not in things like buildings or ships, otherwise roll a d4, and on a 1 or 2, the rest is ineffective. Additionally, when taking a rest on dirt or soil, roll a d20, and on a 20, you will grow metallic roots that dig deep into the soil. Your speed is reduced to 0, you stop aging, and you regain 1 hitpoint per minute, but you have no desire to move from that spot. Someone else must pull you free with a DC 15 Strength check, or the roots cut with fire damage. Whether or not you fight this depends on how hostile you are with the creatures doing this.

### 798 - KUTIGAMI

**Weapon (Longsword, Cursed) – Legendary (127,950 gp, requires attunement)**

This white +2 katana longsword has a straight, paper thin blade with a square orange guard, gold handle with white squares down it, and an orange pommel with gold tassels coming off it. It has a matching white sheath with a gold X at the top between two orange rings, and inside is lined with sturdy orange paper.

Attacks with this longsword do an additional 1d6 slashing damage.

While attuned to this longsword: anytime you down a creature, you gain a +1 to this weapon's attack and damage rolls, to a maximum of +5, each instance lasting for 1 minute. Additional instances replace the oldest instance.

**Cursed.** This longsword is cursed. While cursed, your body become light and dry, making you weigh half your normal weight, giving you advantage on Dexterity saves to dodge attacks but disadvantage on Strength saves, and you are now vulnerable to fire damage, regardless of any other resistance or immunity.

### 799 - MASKUZIING

**Wondrous (Mask, Cursed) – Legendary (99,700 gp, requires attunement)**

This black mask has a golden toothy maw with black teeth, tusks, and pincers coming out of it. The nose is a gold rhombus, and the eyes have thick dragon-wing-like eyebrows. Gold tipped horns come out of the top of the mask.

While attuned to this mask: you can use this mask to perform a Bite attack, as detailed below, which replaces any Bite attack you already have and can only be performed once per turn; you can control the mask's pincers like they are a part of you; you can eat any material for sustenance; and anytime you down a creature, you gain a +1 to this mask's Bite attack and damage rolls, to a maximum of +5, each instance lasting for 1 minute. Additional instances replace the oldest instance.

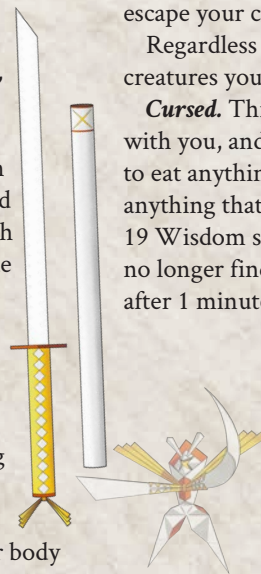

**Bite.** You have proficiency in this melee attack, it uses your Strength modifier, and has +2 to the attack roll.

On a hit, the target takes 2d6+2 magical piercing damage. If they are two sizes or more smaller than you (so Small and down if you are Huge), that creature is now grappled with you as the mask's pincers grab them. If they are already grappled from a previous bite attack, they are instead swallowed, and the grapple ends. While swallowed, the creature is blinded and restrained, it has total cover against attacks and other effects outside you, and they take 2d6 necrotic damage at the start of each of your turns.

If you take damage equal to or more than 10% of your maximum hitpoints on a single turn from a creature you've swallowed, you must make a DC 24 Constitution saving throw at the end of that turn or regurgitate all swallowed creatures, which fall prone within 5 feet of you. If you die, swallowed creatures are no longer restrained by you and can escape your corpse using 10 feet of movement, exiting prone.

Regardless of your size, there is no limit to the number of creatures you can swallow.

**Cursed.** This mask is cursed. While cursed, the mask fuses with you, and you will always feel hungry and be compelled to eat anything you come across. Whenever you come across anything that you think you can eat, you must make a DC 19 Wisdom save or go into an eating frenzy until you can no longer find any food. You can attempt the save again after 1 minute.
