

**Blightking weapon
PDF tutorial**

Before we start painting the miniature, we locate the light reflections on the weapon, by taking a picture of it under our desk lamp. I primed it in Chaos black as it has a great shine to it. I have added a guide for how to locate light reflections in the patreon post.

Paints used :

- Dark grey (Vallejo mc)
- Dark sea grey (Vallejo mc)
- White
- Sky grey (AK interactive)
- Mournfang brown
- Skrag brown

We start by basecoating the blade with dark grey. Towards the inner quarter of the blade, we add 1 part of rhinox hide to the dark grey & layer this area.

The lower part of the blade, we basecoat with a 1:1 mix of dark grey & black .

We now glaze towards the inner quarter of the blade, with mournfang brown. Add 1-2 parts of water.

We now glaze further towards the inner quarter of the blade with skrag brown. We furthermore shade the cracks in the blade with a 1:1 mix of black & dark grey. Finally we add 1 part of dark sea grey to the dark grey & glaze the frame of the light reflections on the blade & highlight the lower edges of the cracks aswell.

We now add 1 part of sky grey to the previous mix & glaze the center of the light reflections & highlight all the sharpest edges with the same mix. (Note, that i moved the reflection further towards the center of the blade – you can see this in the next step).

We now add 1 part more of sky grey to the previous mix & glaze further towards the very center of the light reflections, & highlight the sharpest edges.

We now add 1 part of white to the previous mix, & glaze the very center of the light reflections. Done 😊
