

*Prisoners! Take a
good look at inmate #9152.
This is her punishment
for an attempted
escape!*

*There will be
NO ESCAPE at this prison.
She will stay in this device
day-in and day-out!*

A woman in a dark, form-fitting uniform with a belt and a small badge on her chest stands in a prison hallway. She is pointing her right arm towards a mannequin in a metal cage. The mannequin is encased in a silver, metallic suit with various mechanical attachments, including a headpiece and a device in its mouth. The hallway is lined with metal bars and has a blueish tint to the lighting.

She will be chemically, mechanically and electrically stimulated as her ONLY activity...for the duration of her term! If you misbehave...you will be like this too!

Lets get this thing turned up
all the way...I want the others
to hear the vibrations
from their cells!

A female character with a shaved head is lying in a laboratory. She wears a silver headpiece with a vertical tube extending upwards. A hand is holding a syringe with a green liquid, injecting it into her mouth. The syringe is connected to a tube that goes into her mouth. The background shows a window with vertical bars.

*This is some interesting stuff...an aphrodesiac...
