HERO ME PRO

3D Printers, Hotends, Extruders and Other Supported Components

The Hero Me Pro is the premier print head and part cooling assembly with the widest range of compatible 3D printers. The key design concepts behind the Hero Me is to provide superior part cooling performance and a standards-based print head platform that is highly modular, allowing support of the most brands, printer models, hotends, extruders, fans, ABLs, and other add-ons.

This is a continually growing list of the 3D printers and components that are compatible with the Hero Me Pro and is updated every 1-2 months with new printers, hotends, extruders, etc. as mounts are designed, tested, and released.

This list is updated every 1-2 months as new mounts are designed and tested. For more information visit merlinmedia.com, the new public home of everything from MediaMan3D.

Note: Hero Me Pro is only available from the resellers listed on the next page.
