

## Night Shift

Completed: 02-08-2018

A short story of a cop catching a thief during his night shift at the Central Bank. You can follow two versions of the event, for it's up to you to figure out what really happened that fatal night.

## The Central Bank

I always wanted to do something with two 3D models I have had for a long time. One is called *Bank Vault* by an artist called *Polish*, the other is *Deco Lobby* by *Jack Tomalin*.

Combining these into one large Central Bank scene creates the perfect settings for an old fashion robber and cop adventure. Below I have added the first test renders of these settings.
