

## Magic Dorm 2 Part 1 Guide.

In this first part of Magic Dorm 2 you must get 3 of the girls from the first Magic Dorm game, Mitiny, Lubly and Rala, to swear on a magic crystal, provided by Elana, that they will be good.

To do so, you will have to do the most unusual things:

-1 To prove your worth, Rala is going to ask you to make sauce with her and she will ask you for a series of ingredients. First she will ask you for a tomato that you will find in the hedges of the inner courtyard where Feye and Sanja are.

-2 After you have the tomato, Rala will ask you for something to flavor the sauce, some garlic that you'll find inside a padlocked locker in the locker room. You can open the locker with the key you'll find at the entrance, where Mr. Peterson is under the table on the right.

-3 In the locker room you will also find a dirty sock, next to the locker full of clothes that you can use to wake Xana up momentarily.

-4 Once Rala has the garlic, she decides to introduce sugar in the sauce but she puts too much, so she will ask you to find something acidic to counteract the taste. You'll get that by giving her some lemon peels.

-5 You get the lemon peels by giving Feye and Sanja the lemons you find at the outside entrance, in the crystal tree on the right. You will get the lemon peels but also juice that you can use on Xana.

-6 When you give the lemon peels to Rala, she ends up making a dubious sauce that she gives to you. And she reveals to you the ingredients she really wants: Essence of primordial, sand of wisdom and the saddest tears of the happiest being. Ingredients that you will get later on.

-7 Now you can give the sauce to Feye and Sanja, who will end up staining Feye's faun's pants and give them to you.

- 8 By giving Feye's stained pants to Amastra, she will let you access the football field where Menana and Mitiny are.

- 9 Both Mitiny and Menana need you to give Menana something to practice divination with. You get that by giving her the vermin bones that you find at the outside entrance, at the bottom left between the tree and the bush. After giving them to her, Menana will give you the nice powders that you can use on Mimi. Then Mitiny will ask you for some blue feathers that you will get from Xana when you finally wake her up.

- 10 To wake up Xana, you must use the dirty sock that you find in the changing room. This will wake her up momentarily but if you leave the room you will find her asleep again.

- 11 While Xana is awake because of the sock you must give her the Lemonade. You get the lemonade by using the lemon juice you got from giving the lemons to Feye and Sanja with the pile of sugar next to Rala. When she is awake you can take her beer and she will give you the blue feathers that Mitiny wants.

-12 When you give the feathers to Mitiny she will ask you for a log that you will get from Feye and Sanja. To do this you must give them Xana's beer and they will break one of the logs from the

palisade in the inner yard. At this point you will be able to access the door leading to the classroom area but you will lack the key to open it. Tom suspects that Mr. Peterson has it, but you must find a way to calm his mind before he can reason with it.

-13 With the feathers and the log Mitiny will want to form a tothem but first she wants you to find her something that will entertain Menana and, incidentally, give her information about what Lubly is up to, which in this case will be a book that you will get from Labeth in the library.

-14 To get the book you must first get Lubly to trust you. For that you will need Mimi to give you her approval which you get with a kiss. Tom won't want to kiss her until you use the nice powders that Menana gives you when you give her the varmint bones.

- 15 After Mimi's approval, Lubly will tell you that she is looking for a book but for that you will have to find Labeth's antenna. Amastra will give you the antenna if you give her a piece of the root gate from the inner courtyard.

- 16 In order to get a piece of the inner courtyard root door you will need to use Jelena's probably deadly liquor on her. The door will break and you will be able to grab a piece. She will give you the liquor when you manage to wake up Xana for good.

-17 After giving the piece of the root gate to Amastra she will give you Labeth's antenna. With the antenna Labeth will find the book she needs but she will have to use a special visor to translate it.

-18 To make the special visor, you must find 3 crystals and a can. You will find the can in the cafeteria on the floor to the left of the bar where Rala is, a crystal is on the brown statue at the entrance, next to the door leading to the changing rooms, another one is in Menana's stall on the left side of the blanket and a third one is on Mimi's chair, you can grab it after giving Mimi the kiss. Once you have all the parts the visor will form in the inventory.

-19 When you give the visor to Labeth, she will translate the summoning that Lubly needs and will give you a paper with the transcription as well as the book from where she has translated it.

- 20 Upon giving the transcript to Lubly, she will invoke an ancient goddess, and on the ground in front of her will appear essence of primordial needed by Rala. At this point Lubly will swear to be good on Elana's crystal.

- 21 You can now give the book given to you by Labeth to Menana and Mitiny will proceed to use the tothem she has created with the log and the blue feathers to summon the ancestress. The ancestress will ask Mitiny to make peace with the people of Florala and to do so Mitiny will wish to make a gift of peace to give to the fairy Lim who is in the garden of native plants, behind the root gate that you have previously broken.

-22 To prepare the gift of peace you will need something to wrap it and something to tie it. To wrap it you must give Mitiny the green paper that you will find in the library, on a shelf at the bottom right.

-23 To tie it you must use the fishing line that Mimi will give you when you give her the blue leaves that you will find in the garden of native plants on the right side. After giving these two things to Mitiny, she will create the gift of peace and give it to you to give to Lim.

-24 When you give the gift to Lim, it destroys her tree, making her cry and give you the saddest tears of the happiest being, another ingredient previously requested by Rala.

-25 When you tell this to Mitiny she is very satisfied and swears to be good on Elana's crystal.

-26 After this the ancestor is upset with Mitiny and decides to give you something she had in store for her, the sand of wisdom, another of the ingredients Rala wanted.

-27 Now you can give Rala the three ingredients, the essence of primigenia that appears after the appearance of the ancient goddess, the saddest tears of the happiest being that Lim gives you when you give him the gift of peace and the sand of wisdom that the ancestor gives you to be disappointed with Mitiny. With it Rala creates the potion she wanted, gives you the remains, and swears to be good on Elana's crystal.

-28 By using the remains of Rala's potion on Mr. Peterso, she regains her sanity and gives you the key to the classroom area. Now you can go to the door of the inner courtyard area and complete the first part of Magic Dorm 2.
