

**Wordbearer praetor reddish
armour**

Step-by-step

◆ **Paints required:**

◆ **Reddish armour**

- **Abaddon black**
- **Wordbearer red**
- **Evil suns scarlet**
- **Basic skin tone (Vallejo mc)**

Before we start painting the miniature, we locate the light reflections on the armour , by taking a picture of it under our desk lamp. I primed it in Chaos Black as it has a great shine to it. I have added a guide for how to locate light reflections in the post description.

We start by basecoating the armour with a 1:1 mix of wordbearer red & abaddon black.

We now glaze the frame of the light reflections with pure wordbearer red – add 2-3 parts of water.

We now make a 2:1 mix of wordbearer red & evil suns scarlet & glaze the center of the light reflections.

We now add 1/3 part of basic skin tone to the previous mix glaze the very center of the light reflections. We furthermore shade the deepest recesses with pure abaddon black – add 1-2 parts of water. Finally we edge highlight all the edges, besides the edges closest to the light reflections & the runes in the armour, with a 2:1 mix of evil suns scarlet & wordbearer red. For the edges closest to the light reflections & lower edges of the runes, we edge highlight with the same mix as for the very center of the light reflections. Done 😊 !
