

NMM gold
Step-by-step

◆ Paints required:

NMM gold

- **Dryad bark**
- **Abaddon black**
- **Averland sunset**
- **Mournfang brown**
- **Ivory**
- **White**

Basecoat the trim with a 1:1 mix of dryad bark & mournfang brown.

Now start glazing in the frame of the light reflections in the trim with pure mournfang brown – add 3-4 parts of water. I have added a video reference for how to paint a NMM trim in the post description.

We now glaze more towards the middle of the light reflections with a 1:1 mix of mournfang brown & averland sunset.

We now glaze the middle of the light reflections with pure averland sunset.

We now glaze the very middle of the light reflections a 2:1 mix of averland sunset & ivory.

We now shade all the areas still covered in the basecoat with thinned down abaddon black – included all the recesses – add 3-4 parts of water.

We now edge highlight the trim with pure averland sunset.

We now add a couple of white dots in the middle of the light reflections – we furthermore add some white dots randomly here & there, to create a shine feeling. Dont forget to highlight all the nails too. Done!
