

**Yndrasta
wings
Step-by-step**

◆ Paints required:

Wings

- Basalt grey (Vallejo mc)
- Rhinox hide
- Mournfang brown
- Abaddon black
- White
- Ulthian grey
- Corvus black

We start by basecoating the wings with basalt grey.

We now glaze the tips of the feathers, with a 1:1 mix of rhinox hide & basalt grey – add 2-3 parts of water.

We now add 1 part more of rhinox hide to the previous mix & glaze further towards the tips of the feathers.

We now take pure rhinox hide & glaze the very tips of the feathers – we furthermore add 1 part of abaddon black & once again glaze the very tips of the feathers.

We now start working on the inner part of the feathers – here we make a 3:1 mix of basalt grey & ulthian grey & glaze the inner half of the feathers – add 2-3 parts of water.

We now add a $\frac{1}{2}$ part more of ulthian grey to the previous mix & glaze further towards the inner part of feathers.

We finally add 1 ½ part more of ulthian grey & glaze the very inner part of the feathers.

We now take corvus black and add 2 parts of water – we now shade in between in the feathers. We furthermore add a dot of white on the very tips of the feathers – add 1 part of water.

We now add a more muted stripe on the upper half of the wings. We make a 1:1 mix of basalt grey & mournfang brown & glaze in between the two layers of feathers. Add 2-3 parts of water. We furthermore make a 1:1 mix of basalt grey & ulthian grey & highlight all the sharp edges on the feathers – add 1-2 parts of water. Done 😊 !
