

Chapter 10 - Kagna and Gehre.

Once again, I had the unpleasant experience of having my consciousness switched off so that my evolution could take place.

And after waking up, I felt great. Even better than before.

'Oh, I've shrunk in size. Well, my race is now Small Poison Taratect, so... But that's not important now. What's important is the new abilities.'

My Status is extensive now.

'How convenient, the system is even showing off the new skills. I've gained some resistance skills and the [Poison Attack] skill. There's also the [Cutting Thread] skill that might help me out.'

I was hoping to gain a few more attack skills, but that didn't happen. It's a shame...

'All right, now let's open the store and spend those 1,400 points. That's a lot of points. I'll finally be able to buy a skill that help me with my SP.'

So, after some searching, I found two interesting skills.

[HP Auto-Recovery LV1] and [SP Recovery Speed LV1].

'These two skills will help me a lot. I don't have any ability to recover my HP when I'm injured, and my SP doesn't recover quickly unless I rest.'

These two skills are necessary!

'I'll buy them both. I don't remember the prices in the original story, but aren't they a bit inflated? 500 points per skill. But at least now I have both skills.'

With the 400 remaining points, I couldn't buy the skill to control mana, so I decided to save the points for later. And now that my evolution is complete, it's time to go after the dragon.

'Oh, it's true!'

The duration of the effect of the editing skill has doubled again! It was 5 minutes when I was just born, when I became a Small Taratect it became 10 minutes, and now editing lasts 20 minutes!

That's insane!

'Wait for me, dragon Araba!'

I destroyed my house using my new ability to cut and then descended to the bottom of the hole. My hunt for the Alba dragon will begin.

####

As soon as I reached the bottom, I started to feel a little nervous. I began to feel a chill all over my body, a sign that something dangerous could happen at any moment.

Boom~~

Boom~~

'What the fuck?' So I ran away and hid behind some rocks. 'Are those footsteps? Are you kidding? They're like explosions!' Then, the one who was producing these thundering footsteps appeared.

'It's not the Araba dragon. It's them, the two land dragons who only walk together. I've forgotten their names!' I want to use my appraisal skill on them to see their names, but I'm too nervous to do so.

I leaned against the rocks and stood still without making a sound.

'Should I use the editing skill and kill them?'

[The skill "Fear Resistance LV1" was learned]

'What? Am I that scared?' No, I'm not that scared.

I took a breath and looked at the two dragons. They were really big, huge. If they wanted to, they could step on me and kill me easily. There was no way I couldn't be scared.

'If I'm scared of them, imagine when I meet Araba? I have to have confidence in my editing skill.'

Average Offense Ability: 38

Average Speed Ability: 537

'I'm going to make two edits. I'm going to set my Offense Ability to 10,000 and my Speed Ability to 10,000. Yes, I want to push the limits.'

[Edits applied successfully!]

Let's see.

Earth Dragon LV26

Kagna

Skill Points: 31,200

Stats

HP 4,198

MP 3,654

SP 2,798

Offense: 3,989

Defense: 4,333

Magic: 1,837

Resistance: 4,005

Speed: 1,225

'Wah, that's insane. I'm faster and have more strength, but there are two of them! And they're both powerful!'

Earth Dragon LV24

Gehre

Skill Points: 31,000

Stats

HP 3,556

MP 2,991

SP 4,067

Offense: 3,433

Defense: 3,874

Magic: 1,343

Resistance: 3,396

Speed: 4,122

'All right, I have to calm down. My strength and agility are high; I can do this. Ah, but they're terrifying. They're very threatening! I can understand why Kumoko was afraid of these monsters.'

If I, who can edit my Status, am so scared, imagine her, who was still weak when she first encountered these dragons.

'Let's see, let's come up with a plan. I have to fight with one at a time. Facing them both at once will be difficult, mainly because of Gehre's speed.'

My speed is 10,000. Do I really need to fight with one at a time? It's possible that they won't even be able to keep up with my movements.

[The skill "Fear Resistance LV1" became "Fear Resistance LV2"]

'Well... I'm still scared. Hm? They look like they're getting ready to rest.'

The dragons lay down on the ground together. Oh, and Kagna is in front of her companion. As far as I remember, he's the tank.

If I'm correct, their battle strategy is...

Kagna attacks and draws attention to himself, and Gehre takes the opportunity to attack the enemy in the back or flanks.

'So, I think I should kill Gehre first. Gehre is more of a problem because of his speed and ability called [Dimensional Maneuvering].'

But since they're going to rest now, I should wait for them to sleep, shouldn't I?

[The skill "Fear Resistance LV2" became "Fear Resistance LV3"]
